CO_2 Neutral

BiOBUDDi searched for a resource which absorbs carbon dioxide, a resource which is recyclable and usable for the production of toys. BiOBUDDi discovered these traits in sugar cane plants. These plants absorb carbon dioxide to grow while turning it into oxygen. The side stream of this sugar cane processing can be used to create bio-ethanol, this is a kind of alcohol used to create green polyethylene (Green PE). This polyethylene is compounded in Germany on the basis of its own patented formula. It forms the basis of all BiOBUDDi's renewable plastic products. BiOBUDDi products have a positive impact on CO_2 emissions instead of a negative one.

100% Recyclable
100% Recyclable
100% Reciclable

Recyclable

BiOBUDDi considers the entire life cycle of great importance. Not only the production phase but also the final phase of a product is closely examined. Materials that BiOBUDDi uses to make its products can be recycled. It differs per country whether products are actually recycled. This is a constantly changing and innovative process. If our products are not recycled, there is still a positive CO_2 impact.

Biobased
Biosourcé
Biobasado

Biobased

BiOBUDDi is friendly to the environment. The production process cycle, the use and the waste phase of BiOBUDDi's products are entirely eco-friendly. At this moment our main basic material comes from sugar cane plants, unlike oil, this is a sustainable resource. We reuse a portion that remains in the processing of sugar cane. This portion forms the basis of a natural developed compound that is biobased. Biobased products are those derived from plants and other renewable resources as opposed to non-renewable materials, such as petroleum. BiOBUDDi can prove that its products are biobased through a DIN CERTCO certification from the recognized testing company TÜV Rheinland.

Made in the Netherlands
Fabriqué aux Pays-Bas
Fabricado en Holanda

Made in The Netherlands

BiOBUDDi originated in the Netherlands. To ensure the quality we check the production process from up close. This is also one of the reasons that the toys are produced in the Netherlands. Our process is guaranteed of respect for the earth and people on it. In order to have the production process entirely in our own hands, it was decided to produce everything ourselves. The entire development of the product takes place with love from the Netherlands. The Netherlands is a beautiful country that values quality and environmental friendliness. We would like to make the message of building a better tomorrow known worldwide throughout our products.

Domino

BiOBUDDi has developed three unique domino sets for children aged 6 and up. Playing with dominoes has been popular in every living room for years. The dominoes are made from the unique BiOBUDDi material, which makes it biobased. Every play set contains many dominoes, but also beautiful scenes made of high-quality cardboard.

Here we highlight photo of the “Domino Castle” set. Children first build a large castle out of carton, then they start placing the dominoes. Ultimately, they build a unique track that can reach 5 meters with all kinds of cool challenges that have been incorporated into the castle.

PIXEL AND CREATE

Get to know our toy concept Pixel & Create.
Pixel & Create looks like embroidery and ironing beads only you don't need a needle and thread, plus the ironing beads don't fly around your ears either. The eco-friendly parts with a hole on the bottom and a nop on the top are called pixel blocks. To be able to Pixel you need a base plate, a drawing and pixel blocks.

Children can start with Pixel & Create at the age of 4 years, off course also grown ups can Pixel & Create. BiOBUDDi has developed several sets. The sets come with many pixel blocks, a base plate and building cards. Every set also contains a tool to easily release the pixel blocks! Have fun and start with Pixel & Create.

Big Blocks

BiOBUDDi makes exciting and colorful building blocks out of biobased materials. The big blocks are ideal for children aged 1.5 to 6 years old. Let's build a ship, airplane, car or house with the educational building blocks. The possibilities are endless!

The educational building blocks are made from a side stream of sugarcane plants. The toy blocks are safe, sustainable and eco-friendly. Building with blocks will improve your little one's hand-eye coordination, perseverance and motor, spatial and cognitive skills. Kids practice lasting life skills through play and creativity. Toy blocks support a little one's development, like learning colors, shapes and a lot more.

Are you looking for an educational present for a toddler or preschooler? BiOBUDDi is a great option.

Let's have a positive impact on the planet!

BiOBUDDi is committed to build a better tomorrow, and for this reason starts producing sustainable and eco-friendly toys made of new biobased materials.

Regulators increasingly warn of unsafe toys that fail to meet safety requirements. The checks have been tightened with more recalls as a result. The desire for eco-friendly and safer toys is greater among parents, according to research.

Our new "green" biobased toys are derived from plants, not oil. We also do not add any oil-based chemicals during the manufacturing process to "enhance" the performance or color of our product. All extra product materials are eco-friendly. The products are manufactured in the Netherlands.

"We shall require a substantially new manner of thinking if mankind is to survive."

-Albert Einstein-
(1879-1955)

Ayons un impact positif sur la planète !

BiOBUDDi s'engage à construire un avenir meilleur en produisant des jouets durables et respectueux de l'environnement à partir de nouveaux matériaux biosourcés.

Les organismes de réglementation mettent de plus en plus en garde contre les jouets dangereux qui ne respectent pas les normes de sécurité. Les contrôles ont donc été renforcés, engendrant ainsi davantage de rappels. Par ailleurs, les études montrent que le désir d'avoir des jouets écologiques et plus sûrs est de plus en plus présent chez les parents.

Nos nouveaux jouets "verts" biosourcés sont produits à partir de végétaux et non de pétrole. Nous n'ajoutons pas non plus de produits chimiques à base de pétrole pendant le processus de fabrication, qui modifieraient les propriétés ou la couleur de notre produit. Toutes les matières premières supplémentaires sont respectueuses de l'environnement. Enfin, nos produits sont fabriqués aux Pays-Bas.

"Nous aurons besoin de penser de manière radicalement différente si l'humanité veut survivre".

-Albert Einstein-
(1879-1955)

¡Tengamos un impacto positivo en el planeta!

BiOBUDDi está comprometida con la construcción de un mañana mejor, por lo que produce juguetes sostenibles y ecológicos fabricados con nuevos materiales de origen biológico.

Los reguladores advierten cada vez más sobre juguetes inseguros que no cumplen con los requisitos de seguridad. Como resultado, los controles se han endurecido con más retiradas. El deseo de juguetes ecológicos y más seguros cada vez es mayor entre los padres, según una investigación realizada.

Nuestros nuevos juguetes de base biológica "verdes" se derivan de plantas, no de aceite. Tampoco añadimos ningún producto químico a base de aceite durante el proceso de fabricación para "mejorar" el rendimiento o el color de nuestro producto. Todos los materiales adicionales del producto son ecológicos. Los productos se fabrican en los Países Bajos.

"Necesitaremos una forma de pensar sustancialmente nueva si la humanidad ha de sobrevivir ".

-Albert Einstein-
(1879-1955)
